

TES MAKE CONDUCTIVITY SAMPLE HOLDER

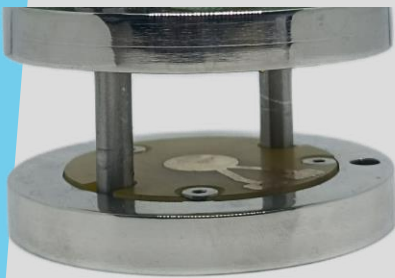

Model No: TES-BM-SH-10

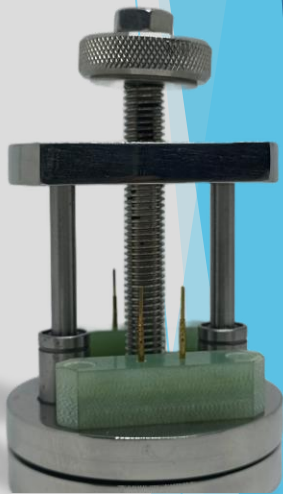

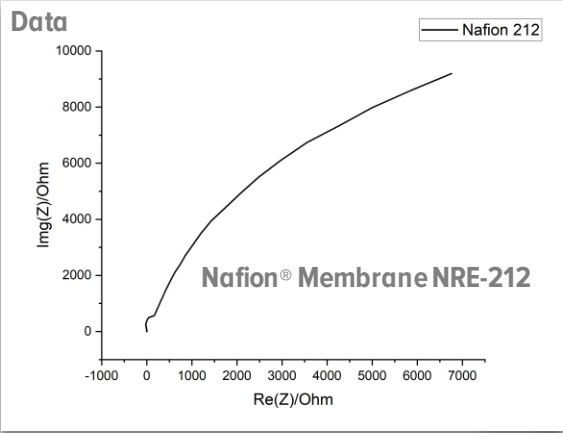

The Electrode Store (TES) brand conductivity sample holder is useful to measure the conductivity of any given solid materials like thin film, membrane, pellets etc.

One of the main advantage of this holder during temperature depended studies temperature probe can be inserted through the hole of adjustable rotator, which makes the probe very near to the upper contact disc makes more accurate sample temperature measurements.

This setup has chamber upgradation which can be used up to 5 bar pressure.

SPECIFICATIONS

DIMENSIONS (IN MM)	64x113
HOLDER MATERIALS	STAINLESS STEEL GRADE 304
CONTACT DISC MATERIAL	HIGH FRA
CONTACT DISC DIA.	10 mm, 25 mm
CONTACT MATERIAL	GOLD
SAMPLE THICKNESS	UP TO 5 mm
TEMPERATURE RANGE	UP TO 150 °C
THROUGH & IN PLANE	OPTIONAL

PARTS INCLUDED:

- SAMPLE HOLDER – x1
- CONTACT DIS – x2 (fitted)
- WD SOLUTION – x1 (Maintenance)
- ALLEN KEY – x1
